

Smarter Fieldwork Starts Here:

OnStation + TransTech Systems Integration Explained

Date: June 5, 2025 at 12 pm – 12:30 pm CST

Registration Link: <https://my.demio.com/ref/2kMrf1rILtV2uFvf>

When live digital stationing and your density tests come together, the job gets a whole lot easier. This quick session will walk you through how the TransTech + OnStation integration helps reduce burnout, streamline your workflow, and give both field and office teams real-time access to testing data—without extra steps or manual entry.

We'll keep it simple and useful:

- You'll see exactly how the integration works
- Learn who it helps (and how)
- Understand what you need to get started (hint: it's quick, and no devs required)

Whether you're out in the field running tests or in the office reviewing results, this integration is built to save time, cut down on frustration, and help your team make better decisions faster.

Speakers

- Patrick Russo – CEO of OnStation
- John Lamond - Sales Manager at TransTech Systems, Inc.
- Jacob Szwarcberg – Developer at TransTech Systems, Inc.

Agenda & Key Talking Points

1. Welcome & Session Goals (3 mins)

- Brief intro from the TransTech and OnStation teams
- Purpose: A quick, no-fluff walkthrough to help you understand how the integration works and whether it's a fit for your team

2. What the Integration Solves (5 mins)

- Manual density testing workflows cause delays, errors, and added field time
- Real-time station-based syncing helps reduce burnout and improves safety
- It's about smarter, faster decisions with less effort on both ends

3. How It Works in the Field (8 mins)

- PQI 380+ gauges: Scan a QR code, data uploads automatically
- PQI 380 gauges: Upload via USB, then sync through TransTech Connect
- Send information to the OnStation Portal to log each test to its precise station location
- No development work needed—just a quick setup

4. Who This Helps (and How) (5 mins)

- **Field Techs:** No need to write down or re-enter results
- **Office Teams & CEIs:** Live access to testing data by location
- **PMs & DOTs:** Accurate, verifiable records for smoother reporting and closeout

5. Getting Started: What You Need to Know (5 mins)

- Requirements (OnStation Subscription, TransTech System Connect Subscription, Compatible Gauge) and Overview of pricing and what's included
- Setup takes under 10 minutes
- Support available from both teams
- Where to go next if you're ready to try it out

6. Live Q&A (Up to 10 mins)

- Quick opportunity to ask questions or request a follow-up
- Resource links and support contact info
